Star Wars Squadrons, one of the most anticipated cockpit based games of 2020 has elected not to include support for TrackIR.

Twitter thread: https://twitter.com/tibermoon/status/1304460778490277890
It is a VR compatible game, so the technology is there, but they don't care about TrackIR users. I suggest trying to reach out to the developer if you haven't already as a lot of PC sim enthusiasts are annoyed about this
